

NOTES:

- 1/ Esduino jumper JB2 must be set for PT4 (1-2)
- 2/ Esduino jumper JB3 must be set for PM4 (1-2)
- 3/ Esduino jumper JB5 must be set for 5V operation (1-3)
- 4/ If power is supplied via pin 9 of J6 and is greater than 5V then J8 MUST be set for Vin
 ...otherwise the Esduino and shield may be damaged by overvoltage
 Leave J8 unjumpered if pin 9 of J6 is unused

* Note 4
